

Bachelor of Science
(Level 7 NFQ)

Module Name Year

2025-26

Assignment CA1 - 2026

Lecturer:	Brendan Munnelly
Student ID:	
Student Full Name:	
Group:	BSC20926B
Web hosting account	.github.io
Due Date:	25 October 2026
Weighting:	12.5% of Year

Instructions

You must include your name and student ID as a comment in the <head> in all your submitted HTML files. For example:

```
<!-- John Smith 12345 -->
</head>
```

Complete the following tasks at the hyperlinks below:

Working with HTML and Debugging HTML

You create and work with three web pages, named **index.html**, **page-1.html** and **page-2.html**. Your **index.html** page is in your main folder. The other two are in an **/exercises** subfolder.

All three pages are displayed with the default web browser styles. You update your **index.html** page to link to **page-1.html** and **page-2.html**.

(5 marks)

Container (Semantic) Elements

You create a new web page named **page-3.html** in **/exercises**. Add six <section> blocks with two paragraphs of lorem ipsum content. Link to this new page from **index.html**.

You organise the content of all four web pages into a logical structure with container ('semantic') tags.

(5 marks)

Working with Layout

You link your four web pages to the CDN hosted version of TailwindCSS.

Add standard padding to the container tags and margins to the formatting tags to generate single-column responsive layouts.

(5 marks)

Working with Text

Use TailwindCSS classes for updating text size, font family, font weight, font style, text alignment, text leading, text tracking, and text case in your **index.html** and three exercise files.

(10 marks)

Working with Colours

You add text and background colours to the four web pages you created previously.

(5 marks)

Classes and Custom Properties

Add classes with TailwindCSS text and background colours to your **page-3.html** web page. Ensure your colour choices offer sufficient contrast and accessibility.

(10 marks)

Working with Favicons

You create a favicon using an online service and an image you have chosen yourself and insert the favicon into the <head> of your **index.html** home page.

(5 marks)

Adding Images

You download and work with two new web pages: **page-4.html** and **page-5.html**, in your **/exercises** folder.

You also insert various downloaded image files in the two web pages. In your home page **index.html**, add hyperlinks to the two new web pages. Also add an appropriate image for a frontend developer.

(10 marks)

Working with Hyperlinks and Styling Hyperlinks

You update your **page-4.html** and **page-5.html** web pages with relative and internal hyperlinks, and add TailwindCSS styles to them.

(10 marks)

Hero Blocks with Text

You download and work with a new web page named **hero-text.html.** In your home page **index.html**, add a hyperlink to this new web page.

(10 marks)

Hero Blocks with Images

You work with a new version of the **hero-text.html** file, named **hero-image.html**. You also download a new sample image file. In your home page **index.html**, add a hyperlink to this new web page.

(10 marks)

Hero Blocks with Videos

You work with new versions of the **hero-image.html** file, named **hero-video.html**. You also download a new sample image and video file. In your home page **index.html**, add a hyperlink to this new web page.

(10 marks)

Working with Google Fonts

You add various Google Fonts to two web pages: **page-4.html** and **page-5.html**.

(5 marks)

When finished:

- Compress all your work into a ZIP or RAR file and upload it to Moodle.
- Upload this Assignment Cover Sheet to Moodle.
- Upload all your files to your **username.github.io** web hosting account.
